EXHIBITOR TESTIMONIALS

Smt Darshana Jardosh

*Minister of State for Railways and Textiles,
Government of India*

This event of Techtex India organized by Messe Frankfurt has 170+ exhibitors from across 6 countries and they know the potential of India. The Indian government has taken crucial steps to encourage the development of textiles and technical textiles and support the complete ecosystem through the launch of PM MITRA Parks and other schemes. Geotextiles has a huge scope in the future considering the number of infrastructure development projects like roads and railways and several others underway. These will also be used in the agriculture, animal husbandry, fisheries, water resources industries, sportswear and medical healthcare which has grown the non-wovens category rapidly during COVID-19. So through an exhibition like this we get to see the vision as well as innovation from the industry which earns the support from the government.

Mr Shailesh Agrawal

*Head – Marketing (Polyester),
Reliance Industries Limited*

Several products at Techtex India are path breaking and innovative. HexaREL is one of the products that we are displaying and it is a very new and innovative finish for applying on the fabrics. Reliance is also exhibiting RDY Yarns and some other materials here. The show gives a good opportunity to showcase the products. To sum up, it's always a pleasure to be here at Techtex India by Messe Frankfurt always has something that we look forward to and it should continue the way it is going. The show has witnessed largest number of visitors this edition in India and we can see a lot of people walking in on the final day which is a very good thing.

Mr Prasanna Joshi

*Head – Technical Textile
Marketing,
Aditya Birla Yarn*

We have been showcasing spun yarns produced using the functional fibres like Aramids, Modacrylic Pyrotex, FR Viscose and FR Polyester which have heat and flame resistance properties. We received extremely great response in the last two and a half days. Techtex India is a good platform for creating awareness and promoting technical textile applications in India. There are also a lot of suppliers of uniform and work wear applications here. One word for Techtex India is 'Innovative' and we will be interested in the next edition.
